

ANE

INDUSTRIAL SUPPLIES

- COMPANY PROFILE -

ABOUT US

In 2006, ANE Industrial Supplies acquired Transport & Marine, which was established in the late 1970s. The business was the first international WOODWARD partner being appointed in 1976. Since then and through this acquisition, ANE continued this appointment as an official WOODWARD Governor Installation, repair and service facility. WOODWARD are leaders in the manufacture and design of electro mechanical, mechanical and electronic prime mover control systems for marine, turbine and industrial applications.

ANE offers professionally tailored solutions with over 60 years collective engineering experience in this industry. Our ability to assess and advise on your installation and process needs, coupled with our flexibility to offer specific outcomes to meet our customers' needs is what differentiates our services within the industry.

We have built our Team around providing flexible, swift, reliable and professional service offering excellent workmanship and thereby durable solutions.

PARTNERS

The markets and industries we serve are ever changing and demand for technological advancement is increasing. It is never easy as a solely South African based company to stay abreast of these technological changes and trends. It is for this reason that we have formed Partnerships with carefully selected partners who work in and at the cutting edge of our industry and whose expertise includes offering retrofit solutions, which are the latest international solutions available.

ANE therefore provide an extension of the global expertise available through these partnerships. By doing this we ensure that our customers have peace of mind in terms of the quality of the expertise.

WOODWARD delivers lasting contributions to energy control, always innovating for a better future. Our association with Woodward assures leadership in energy control and optimisation solutions.

Woodward integrates leading-edge technologies into fuel, combustion, fluid, actuation, mechanical and electronic control systems and governing. Our growth is driven by the increasing demand for fuel-efficient, low-emission, and high-performance energy management.

The Woodward products are of the highest quality and are tried and tested across the globe in a wide range of applications. Access to product support engineers responsible for installations across over 100 countries in multiple industries provides our customers with an incredible base of knowledge of speed control systems.

Goltens is an Authorised Independent Service Facility for Woodward Governors and Control Systems and in 2016, Goltens became the local Channel Partner for the Middle East and Africa.

Goltens has been serving the marine and power industries since 1942, providing ship and plant owners with engine maintenance and repair services, in situ (field) machining, welding and pipe repairs, and full-service machine shop services including engine component reconditioning.

Goltens has developed professional project teams with extensive experience in designing, manufacturing, installing, and supporting controls identical or similar to that required for your application. Goltens is committed to provide responsive after sales service once commissioning has been completed.

Goltens is a Recognised Engine Retrofitter (RER) and Recognised Turbine Retrofitter (RTR).

Turner Engine Control Solutions (TECS) is one of Woodward Governors largest central distributors worldwide, operating from different locations across Europe and the Middle East.

We manage a network of agents in Europe and the Middle East, providing support to our customers around the world – 24 hours a day, seven days a week – for parts, technical support, or emergency service.

Customers rely on us for our technical knowledge, problem solving capabilities and collaborative nature. As a factory trained and authorised Woodward channel partner, we provide the following services: Governor and actuator overhaul, electronic repairs, worldwide field service, Woodward product training, engineering, cabinet assembly, parts sales.

Turner ECS is a recognised Engine Retrofitter (RER) and Recognised Turbine Retrofitter (RTR).

ANE focusses across industries, which include, Marine, Power, Mining, Sugar, Paper and Pulp and other industrial applications. This ensures that we have broad industry and customer experience and as such we have built lasting relationships with successful local and international organisations.

The ANE Team is dedicated to excellent customer service and is committed to ensuring that customers experience a closed loop relationship approach.

PRODUCTS

We provide a wide range of electronic / digital and mechanical products. In order for our qualified experts to determine the best product and solution to fit the specific application, they will often be required to conduct a site survey and assessment to provide precise expert advice.

Our work is handled by our own highly qualified and authorised technicians and approved by our engineers.

repair of electronic
and digital speed
control systems

repair of
fuel pumps
and injectors

ANE provides a comprehensive range of services from on-site surveys and assessments, inspections and recommendations, installations and commissioning of products and on-site repairs where feasible.

A significant package offering is our service and maintenance contracts. These are formal agreements based on agreed service levels to ensure expectations are agreed and met. This process allows for examination and testing of equipment at predetermined intervals based on customer and OEM requirements. From these inspections, reports and recommendations are provided to you the customer. Where immediate attention is required and can be undertaken this will be done. More advanced work will be scheduled with the customer for a suitable date.

These service and maintenance contracts are very flexible and allow the customer to choose the level of service required.

Our work is proudly handled by our own highly qualified and authorised technicians and approved by our engineers. Any assistance from our partners is always overseen by our Team, thereby offering the highest final quality to you the customer.
